EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Andrew Van Court on 6/23/05.

The application has been amended as follows:

- Claims 20,49,50; on line 3 of each, "an" has been deleted, and "characteristic" has been replaced with - - characteristics - -.
- Claim 49, 5th line of step c, "surface" has been deleted and - - face - - inserted in its place.
- Claim 50, 5th line of step c, "surface" has been deleted and - - face - - inserted in its place.

2. The following is an examiner's statement of reasons for allowance: the prior art does not teach nor suggest to carry out the methods for incorporating active particulate solids within or onto a face of a woven material according to independent claims 20, 49, or 50 while maintaining the inherent properties of the woven material and ability of active particulate solids to react with external matter, per pages 12-14 of Applicants' Remarks of 6/13/05. The independent claims patentably distinguish over US4175055, the closest prior art, which requires the polymer particle impregnated porous substrate to be compacted and sintered (col. 7, 33-66), by definition requiring coalescence of polymer particles, which together would cause stiffening and not be capable of maintaining characteristics of a woven material, and further impeding the intended function of the incorporated active particulate solids due to polymer coalescence/ loss of active particulate surface area.

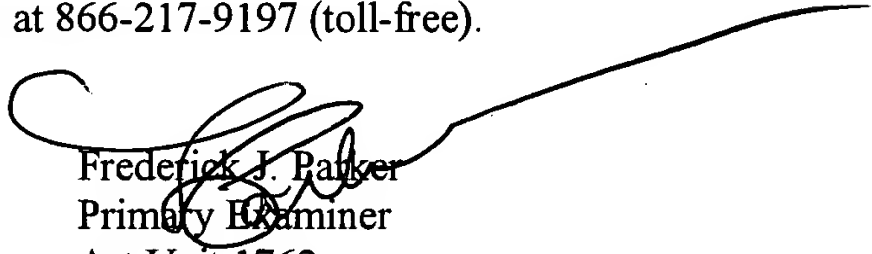

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Frederick J. Parker whose telephone number is 571/ 272-1426. The examiner can normally be reached on Mon-Thur. 6:15am -3:45pm, and alternate Fridays.
